

Only a person who is completely ignorant would max out on leverage and said person should not be trading to begin with.

While I believe that the Forex market is just fine the way that it is and that you should keep your dirty hands off of it I am willing to offer some suggestions:

A. 1.5 to 1 trade size and 30 to 1 max leverage; trader is limited to placing one trade the size of 1.5 to 1 every 60 seconds. This would greatly reduce risk while at the same time leaving the door open for the significant gains that draw people to the Forex market.

B. No less than 20 to 1 leverage!

C. Leave the Forex market alone; profitable traders are experienced in risk management and unprofitable traders cannot be protected as the net result is a destroyed account.
